Measure, Appointment or Topic: HB3362

Unsure what this it trying to solve other than imposing a tax (Super Majority Party in Salem), because the Electric Vehicle push has impacted the exorbitant Gas Tax Oregonians already have to pay compared to the rest of the nation. Essentially imposing a double tax on individual who cannot afford an electric vehicle is not the solution. Many of those individuals are already low income, and do not need to be supplementing for the Rich Elites who can afford an overpriced E-Vehicle, and are not subject to the Gas Tax. If this is the solution, then the EV owners should be subjected to a higher tax rate over those individuals who do not drive an Electric Vehicle.
