Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3546

HB 3546: Holding Data Centers Accountable

? Data centers have grown exponentially over the last decade and added a lot of costs to

our energy grid.

? The POWER Act makes data centers pay their fair share of energy costs by allowing

regulators to assign costs that only benefit one type of customer.

? HB 3546 ensures that expensive data center caused utility investments are continually

paid for by data centers by requiring signed utility contracts for at least 10 years.
