

Submitter:	Robert Egner
On Behalf Of:	Voter and Tax Payer
Committee:	Senate Committee On Education
Measure, Appointment or Topic:	SB1098

It isn't discrimination to ask that our children aren't subjected to materials that aren't suited for their young minds or that parents don't believe give honest representation of subjects.

It is not discrimination to ask that our children learn math, reading, english , history etc where our state is currently ranked 50th. Dead last in education!!

They don't need DEI, sexually explicit materials etc jammed through their minds when they aren't obviously even getting the necessities of the basics of learning that promote them to getting jobs and preparing them for college.

Discernment is not Discrimination!!!

Requiring the Necessities of basics is not Discrimination!!!

Our educators need to concentrate on education and not indoctrination!!!

Our leadership need to promote healthy learning environments that ensure our children's minds are given the data they need for their futures

No on SB 1098!!
