

Dear Chair Sollman, Vice-Chair Brock Smith, and Members of the Committee,

My name is David Cobar, I live in Portland, Oregon, and I am proud to express strong support for HB 3081 because Oregonians need more support navigating hundreds of available energy efficiency upgrades and rebates.

I support HB 3081 because of the bill:

1. **Affordable Home Upgrades Should Be Easy to Access:** As an Oregonian, I support HB 3081 because it helps people like me afford energy-saving upgrades—like heat pumps and insulation—by providing clear guidance on available rebates and financial support.
2. **Live Support Will Make the Process Easier:** Navigating energy efficiency programs is confusing, and HB 3081 will ensure Oregonians can get direct, personalized help to make home improvements without the hassle.
3. **A Stronger, More Resilient Oregon Benefits Everyone:** By making it easier to invest in energy efficiency, HB 3081 not only lowers utility bills but also creates good-paying clean energy jobs and strengthens communities most impacted by climate change.

I urge you to support HB 3081 because it will make energy-saving home upgrades more affordable and accessible, helping Oregonians lower utility bills, improve home resilience, and navigate rebate programs with live, personalized support.

Sincerely,

David Cobar  
Portland, Oregon
