

Please vote no on the Tire tax. NO NO NO

Tires are already expensive enough, and to charge all Oregonians a tax, that does not have a VERY specific use is negligent in the economic climate we are in right now. 4% would be around 20\$ on the average set of tires. Forget about oversized or truck tires.

I think this is a matter of being efficient in how gov't is run, rather than increasing revenues at the expense of every day working folks in the the rural and semi rural parts of Oregon.

What's more concerning is how the revenue could be used for mass transit projects or even just used to fund operations for mass transit via grants etc...

Use of funds dis proportionately to where the tax is levied or who it is levied against is not fair.

A higher % of people DO NOT buy tires in urban environments, so for urban or mass transit projects, many of the beneficiaries of the spend would not even be adding to it. Example- someone who rides the bus or train and doesn't even own a car. The car drivers are taxed un-equally and the bus riders benefit!

Pleas vote NO on this un-fair and un-necessary tax
