Joint Committee On Transportation

Measure, Appointment or Topic:

HB3362

Look into the \$1Billion dollar error in its 2023-25 budget. Who is running this? "An over-reliance on the highway cash flow model and a lack of understanding on how Statewide Transportation Improvement Program programming impacts that model drove the budget error." Seriously? If we ran our personal household the way these politicians run our State, we'd all be homeless. Why don't you try firing a few key people and using that money to pay for transit, tire pollution & wildfire crossing. What a joke.
