

2 the elected representatives better reading this it is sad and this is the third time in 2025 that I have had to write a letter opposing attacks that you want to impose against your constituents. It feels like every year more and more all you do is sit in that house and trying to come up with more ways to tax U.S. citizens. Attacks on tires that does nothing for our roadways but sends it to your mass transit that doesn't work is ridiculous and I find it reprehensible that you guys continue to try and tax the citizens of Oregon. Please look at the state that you have created and find something constructive to do with your time that is going to fix the mess that you and your predecessors have already created not continue to make this problem worse by taxing your constituents to buy tires period.

Thanks,

Curt Smith
