

Submitter: Aaron Wolf

On Behalf Of:

Committee: Senate Committee On Early Childhood and Behavioral Health

Measure, Appointment or Topic: SB702

I urge in the strongest possible way that we ban all flavored tobacco products in Oregon! The trend of younger people picking up vaping is an exceptionally bad health trend. Everything about it is destructive, including all the litter and garbage these products make. For those using vaping to get off of smoking, they can do so without flavors. The purpose of flavored tobacco is to addict our children, and we will be paying dearly for a whole generation if we allow this trend to continue.
