

Submitter: Teri Butler
On Behalf Of:
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB3362

There are already costs for tires when purchasing and fees to dispose of used tires. Those fees are to assist in the cost of tire disposal. This tax is discriminatory for those low wage earners as well as those that must drive in rural areas where there is no mass transit, or at least limited mass transit.

This also becomes a huge burden on companies that have their own trucks to deliver products. Even if we contracted for delivery of products, this tax would be passed on to us, as no trucking company, especially in this market, are able to absorb these costs.

I STRONGLY urge a NO on this tax.
