

Submitter: Diane Harrison

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

Most people, myself included, have been struggling with higher costs on nearly everything we need. To add a new tax to an essential item would, obviously, hit us even harder. In addition, I live in a farming community where another tax on tires would severely affect the farmers - and when the expenses of the farmers increase, it affects all of us with increases in the cost of dairy and food products. Please stop with the taxes. Our founding fathers came to America to escape unreasonable taxation and look at us now - right back where they started!
