

Submitter: Mary Duvall

On Behalf Of:

Committee: Senate Committee On Early Childhood and Behavioral Health

Measure, Appointment or Topic: SB702

Kids especially, but all humans tend to explore and experiment/. Some things can seriously hurt or even kill them. As a culture we allow far too many toxic materials that generate profit rather than protecting vulnerable citizens from toxic materials. This bill takes the position that dangerous materials with dangerous health implications should be disallowed. I support protecting our citizens from these materials.
