

Submitter: Christopher Johnson

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

I strongly oppose the idea of taxing tire sales in the state of Oregon. It's yet another anti-citizen tax grab in a state that already has a high tax burden as compared to other states.

Look at it this way- Oregon spends huge amounts per student, while having among the lowest test scores in the nation. If they tax tire sales, the almost certain result will be the opposite of what was intended, and that tax will never go away.
