HB3362

This sales tax puts overburden expense on farmers, rural residents and anyone who drives distance for any reason. We are already taxed through fuel taxes. I realize Oregon is searching for added revenue sources, but feel a more equitable solution should be examined. The allocation and distribution of funds raised is vague and subject to what oversight? Now is not the time to burden Oregon taxpayers t with unnecessary taxation. Especially a sales tax that has been rejected by Oregon voters numerous times.

Thank you.
