

Submitter: Scott Montgomery

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

This appears to be another bill devised to do nothing for infrastructure updates, but everything to do with mass transit. Mass transit doesn't work for most instances unless you live in dense urban areas. Even then it is not ideal. This tax is being used for something that will have very limited effect on transportation needs. Do not pass HB 3362. This seems like another opportunity to add a sales tax to voters who have consistently said they do not want a sales tax in this state PERIOD! Stop playing games in Salem and listen to the people you work for.
