

Submitter: Casity Troutt

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

Adding a tax on new tires is a huge burden on families who are just trying to survive. Not only does it affect them when it comes to their personal vehicles, it is also going to drive the cost of goods up. When businesses acquire a new cost, such as a tax or fee, they have to raise their prices to cover that difference. This will once again drive up the costs of everything that is distributed by truck, which is every single product on the store shelves. Thank you for your time.
