

Submitter: Emma Decker

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure, Appointment or Topic: SB993

Authorizing licensed investigators to have access to booking photos would save the state a significant amount of money. Most of my work is in criminal defense, and for tasks such as subpoena service, surveillance, and some witness interviews, I often spend a significant amount of time conducting research online to try and find photos of the individual so that I can verify their identity in-person. This authorization would save time, money, and also increase my sense of personal safety when doing work in the field.
