Measure, Appointment or Topic: HB3362

Comment regarding HB 3362.

Due to the current economy and inflation, it is getting difficult for individuals and families to pay for essentials (housing, food, and transportation). Every year the Oregon legislature looks for ways to extract additional money from its citizens. A few dollars here and a few dollars there keep adding up.

Ironically, the situation is being made worse by electric vehicles (owned by the wealthiest citizens) not paying gas taxes to support the roads and highways. You need to find an alternative tax (? Mileage) to recoup the money lost to these electric vehicles.

In addition, Oregon needs to be fiscally responsible and clean up the waste and fraud in government. No additional money should be extracted from taxpayers.

Sincerely

Keith Eilerman
