

Submitter: Bill Woody
On Behalf Of:
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB3362

This is absolutely crazy with all the inflation cost in Oregon and the transportation industry. We have seen cost increases from 25% to over 100% on parts and then the lost revenue for down time on trucks and equipment has been astronomical. Then to tax our industry and not use the money to improve the transportation industry roads and traffic flow is frustrating.
