**Re: HB 3362**

Please find this submission as written testimony in opposition to House Bill 3362. I find the leadership that introduces taxes on the public without a vote of the people should not occur. In addition to introduce taxation without having it directly accountable to specific issues and projects results in another government uncontrolled spending. Our state leaders should begin to focus on spending cuts and accountable government oversight. Take the current state of the Department of Transportation budget and spending. Shall we also look back at the previous government lead ACA. Yes, federal funds but a disaster project non the less. Our country is trending to accountable government. Our Democratic majority needs to focus on cutting spending and accountable management of what they have been entrusted to as elected officials. No to taxes and new money and more leadership on doing less with what we citizens all ready give you.
