Environment

Measure, Appointment or
Topic: HB3546

This bill is greatly needed! It makes certain these large corporations are actually paying their fair share to cover the requisite grid infrastructure and additional energy costs. Why do we have to push the burden onto the shoulders and pocket books of Oregonians? Small businesses should not have to pay for the energy that corporations can easily afford. Don't let them force us into paying for there continued presence any further than they already have!
