Committee:

House Committee On Education

Measure, Appointment or Topic:

HB3652

Educators have been blocked from talking about class size at the table where unions and employers negotiate labor contracts. - Imagine if we blocked nurses from talking about the large number of sick people on their shift. Imagine a farm worker union not being able to talk about bathroom breaks or protection from the weather. I have been an educator since 1996 when I was classified and making less than 28k a year for the next six years. Those are abusive poverty wages. Having to fight to allow class size deductions is another form of people abusing me. It feels like I've had 28 years of abuse by lawmakers who are out of touch with the people on the front lines. I urge you to pass this with unanimous support. Do what you must, but we document your choices. We counted the 217 republicans and 46 democrats who passed Trump's first law abusing the constitutional rights of immigrants. The first Trump law of 2025.
