

Submitter: Carroll Johnston

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2679

I strongly urge you to support HB 2679 because the protection of pollinators is vital to agricultural crops in Oregon. The pesticides addressed by the bill have been decimating the bee population that is so vital to the pollination and growing of food crops. Runoff of the pesticides into streams also damage fish. People are harmed by them as well. These pesticides should not be sold to the general public who will use them in ways that greatly increase the damage they can do. Please follow the lead of other states that have already tightly regulated these dangerous chemicals. Please pass HB 2679.
