

Submitter: Matthew Grubbs

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

An additional tax on Oregon citizens for the basic needs of their lives - in this case safe transportation for families - is the last thing we need. Not to mention the increased cost of the transportation of goods that will result. It puts an undue burden on already struggling families for projects which do not provide real value for Oregon citizens. Get back to basics and reduce the burden of government on the people. No more taxes.
