On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2679

Dear House Committee on Climate, Energy and Environment,

I am writing in support of HB 2679 to limit the use of neonicotinoids. This class of chemicals should ideally not be used at all given their environmental persistence and devastating effect on pollinators. However, at the very least, they should not be applied by anyone who is not licensed and should not be available to the general public.

Thank you for your serious consideration of this issue. I enjoy eating and certainly don't want the pollinators who make my life possible to have theirs ended by our lack of wisdom and empathy towards all creatures both great and small.

Sincerely,

Kirsten Davis
