

Submitter: Stan Thompson
On Behalf Of:
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB3362

Hello, Legislators and Joint committee On Transportation.

I am and have been a resident of Oregon for Eighty Years. I am also a registered Democrat and I appose HB 3362.

If I have read the proposal correctly, Not one cent is going toward fixing our poor roads which are disintegrating before our eyes.

This Bill is directed at Tires that are essentially for vehicles on Hwys and roads.

Though on my ranch I have a farm tractor, and ten other pieces of equipment, each with inflatable tires. All these inflatable tires will be affected by this poorly thought through Bill. This Bill does not make good sense to me. I recently purchased a full set of tires for my SUV and they cost me \$1290.00 at Les Schwab. Our new president has just placed a tariff on China where the lions share of tires are manufactured. Tack on another 10% to the 4%.

You people who reside in Cities better start thinking about where you will be getting your food from. The reason is, your poorly thought out Tax bills are going to destroy the people who are providing you food for your table.

Another thought, If the very misguided woman legislator who wants to give the vote to 16 year old's gets her bill passed, you will all see elected, more of the ignoramus gentlemen who came up with HB3362.

Sincerely,
Stan Thompson
