

Submitter: Deborah Knapp

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3247

Dear Chair and Committee Members,

I strongly support HB3247 due to our state's increasing demand for reliable electricity. More data centers are being built, one not too far from me. They will utilize a significant amount of electricity. Wind and Solar alone will not adequately sustain the hunger for power within the grid. Hydroelectric dams are a clean, renewable, and sustainable resource. These dams that our population depend on are also reliable. We need these dams to power our laundromats, lights, computers, microwaves, hair dryers, stores, refrigeration, and even the Capitol Building. The list of electrical needs goes on, and continues to grow. Please vote yes on this bill. Thank you for your time and attention.

Sincerely,  
Deborah Knapp
