

Submitter: Marion Hadden

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

I support this HB 3362 for the reasons below:

Revenue from the tire tax would fund filtration systems and stream restoration projects to intercept and reduce tire pollution, protecting vital salmon habitats.

Wildlife crossings, such as bridges and underpasses, have been proven to significantly reduce roadkill incidents and enhance ecological connectivity. The tax would create a dedicated funding source to build and maintain wildlife crossings, helping to prevent crashes while preserving biodiversity.

Thank you, Marion Hadden
