

Submitter: Sue Mandeville

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB216

No Nukes in Oregon. No Nukes in Oregon unless the people vote on it. This bill is just Republicans wasting our time and wanting to ravage the state of Oregon. Building a nuclear reactor without a place to put the radioactive waste is insane. Radioactive waste can remain dangerous (kills all life) for thousands of years. No Nukes in Oregon.

In 1980 Oregonians voted NO to nukes in Oregon. Nuclear generated power is expensive, much more expensive than solar and wind or now wave energy production. Why would anyone with half a brain suggest nuclear? Because Amazon and other Techbros want it. Because it's not safe alternative energy. I can only believe that Republicans think it's OK to ruin Oregon, for just a bit of money.
