

Submitter: Corie Clark

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3546

Make large energy users pay their fair share! We, the citizens of Oregon, should not be footing the bill so large corporations can get free electricity and make millions of dollars off of tax payer money. I am in support of HB3546 because I have seen my utility bills double over the last 10 years and I've nothing to show for it except more pollution and once open land filled with data centers and very little sustainable jobs for Oregonians.
