

Submitter: Jamie Blinco

On Behalf Of:

Committee: Senate Committee On Education

Measure, Appointment or Topic: SB1098

It is not discrimination to protect our children from inappropriate topics and/or images. They are prevented from many things to protect them, such as movies that are at least rated and there are levels where a parent has to approve/be present. Why would we allow something they have ready access to to contain material that isn't appropriate without regulation?

Please protect our children from age-inappropriate educational material and oppose this measure.
