

Submitter: Jacqueline Arn

On Behalf Of:

Committee: Senate Committee On Education

Measure, Appointment or Topic: SB1098

The individuals that are elected in each school district should be responsible to discern what books should be in the school library. The oversight of curriculum is their responsibility. We do not need new laws in regards to this issue. Keeping pornographic books, especially those done in a comic book format should not be available to our young children as educational materials.

Also, parents should have access to see all the books available in their child's library.
