

Submitter: Mark Arnold

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

In the consideration of safety it's important that our representatives do not make maintaining a safe vehicle more expensive than it already is. If tire prices artificially rise it will put undue financial strain on Oregon residents when it comes time for new tires. We already pay a disposal fee. The disposal fee adds to tire ditching in the woods or city streets. A new tax of this nature will have more working families choosing to run old tires past the safe wear, putting us all at risk on the roads and sidewalks.
