

Submitter: Sally Klein  
On Behalf Of: Reading Writing Math  
Committee: Senate Committee On Education  
Measure, Appointment or Topic: SB1098

Committee Members,

Ah, one can always count on Oregon politics to take indecency and perversion a bridge too far.

I've watched parents blocked from reading out loud at school board meetings the type of material you will allow on a bookshelf in tax paid for school libraries.

You rarely fail to make the case for home schooling and common sense when you produce legislation like this Bill.

Free my taxes so I do not have to continue support of your government indoctrination camps. Young minds deserve better. Give me choice.

Where again is Oregon in the National ranking? Are your strategic Graduation requirements on reading, writing, and mathematics helping any?
