

Submitter: Carolyn Partridge

On Behalf Of:

Committee: House Committee On Agriculture, Land Use, Natural Resources, and Water

Measure, Appointment or Topic: HB3103

Dear Legislators - HB 3103 is a timber industry bill which rolls back protections for drinking water and species habitat in favor of

logging. Also, it fails to take into account the enormous value of forests for capturing and storing carbon. Forests are an exquisite "carbon capture and sequestration" system that is already in place, works perfectly and has no cost.

For the sake of future generations, let's preserve and protect what little is left.

Thank you,

Carolyn Partridge

(I have a son and nieces who are very worried about the health of our planet)
