Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

I submit this testimony regarding the proposed 4% tax on tires. We are already one of the most heavily taxes states. We already pay about 60 cents per gallon for gasoline including the state gasoline tax. Taxing the tires does not cure the problems with wildlife. It will just be another means to feed the extraordinary machine that is Salem. If you want to help wildlife get rid of the wolf population that ODFW introduced. While you're at it, get rid of ODFW. Tires are an unrelated commodity to the real game problems.
