Services
Measure, Appointment or Topic: HB3497

By 2030, the number of Oregonians 65+ is projected to be nearly a quarter of Oregon's population. This is not a blip, but a permanent shift in our demographics and our systems are not prepared for it. Every action starts with intent, so I support HB 3497. I support the convening of a task force that can prepare a framework for a plan to secure a better future for all generations in Oregon.
