Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

I strongly oppose this bill. I find the timing for this interesting as i just priced tires yesterday. The price is already out of control. Why on earth would we "study" the effects of tires on waste. A high school drop out would take a look and give an accurate answer. We pay for registrations, and has taxes already. One more to simply be able to drive. For those of us who own multiple vehicles and trailers we will be paying even more. I can't drive them all at the same time but still I pay all these other fees so that I can do all the things I need to with each vehicle. VOTE NO. ??
