Committee: Senate Committee On Early Childhood and Behavioral Health  
Measure, Appointment or Topic: SB702

Hello,

I strongly feel like we have much bigger problems than flavored nicotine vapes. There are overdoses, stabbings and break-ins everyday and we are focusing on flavored vapes and if they should be sold or not. That is silly and a waste of my tax payer money. I'd prefer to be voting on laws keeping homeless off the streets or going after the homeless drug camps and people selling fentanyl and other tainted drugs and poisoning young people in the community.

If you are concerned about kids vaping nicotine, you should also be concerned about them vaping flavored marijuana cartridges and consuming flavored alcohols. Will those be banned too for the sake of the children? Before flavored vapes kids would get ahold of cigarettes by asking older siblings or picking half smoked cigarettes off the ground. Very disgusting. Point is kids will do whatever they can to try things they are not supposed to. Banning vapes won't stop kids from being kids.
