

Submitter: Michelle Stoler

On Behalf Of:

Committee: Senate Committee On Education

Measure, Appointment or Topic: SB1098

Banning school library materials or instructional materials is an act based on fear and ignorance. Families can and should play an active role in educating their children, allowing them to be open to points of view, and providing guidance and framework to help children to understand our world. Banning books spends precious educational dollars to implement a policy of fear.
