Measure, Appointment or Topic: HB3546

Because of the 40% increase PGE has been provided the last couple of years, I now sit in a 50° home because I can no longer afford the pricing. Just a few months ago I had open heart surgery for a mechanical replacement valve along with a pacemaker put in. I am now unable to work and can no longer afford to live under my roof When another price increase happens with PGE. Not to mention my Home insurance. So I imagine I will be homeless within the next few months.
