Measure, Appointment or Topic: HB3362

tire prices, have escalated over the last several years, and along with that disposal fees also have increased proportionately, i owned a tire business for 10 years, so with that being said, my disposal cost were far less, than what i received, so point being, to further burden consumer with tax, would be arduous and costly taxes, in the end, i understand the problem, that tax would be collected for, but am against further cost to the public, a different solution is needed
