

Submitter: John Duggan

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB215

The obvious question is "Where will the radioactive waste go?" Folks up in Yakima might offer some insight. For decades industry has despoiled communities and our planet without consequence, walking away from the damage they cause. Allowing one of the most dangerous industries to start a plant in our State without having a place to dispose of waste seems suicidal.
