

Submitter: Anne Murai

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3546

As a climate planner in the Northwest, I see data centers standing in opposition to our climate goals. Artificial intelligence may lead to some energy efficiency gains, but at the cost of many tons of greenhouse gas emissions and impacts on ratepayers. Holding these energy users accountable is critical to providing ample power for a future that will demand more energy and cleaner energy.
