On Behalf Of:
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB3362

Hello,

I just want to express my strong support for HB 3362. We need money to fund public transit and rail in Oregon. What better way to do this than through taxing cars (specifically tires), which are a destructive form of travel. We need the car-free options! We also definitely need to fund the other purposes of this bill. Let us stop pollution and make our state a better place! Again, I implore you to pass this bill as it is written. Funding rail and public transit alone would be a boon to our state.

Thank you.
