

Submitter: Sharon Krause

On Behalf Of:

Committee: Senate Committee On Education

Measure, Appointment or Topic: SB1098

Biologically, transgender is not possible. No individual, nor doctor for a confused individual can change the DNA - chromosomal integrity of a human by removing body parts or taking medicines. Adults should not lie to vulnerable young people who because of new hormones are experiencing new feelings and confusion. Schoos should not provide instructional materials, textbooks and library materials which suggest DNA changes are possible. Instead, warnings should be given that people engaging in such procedures could become sexually nonfunctional.
