

Submitter: Rebecca McCroskey

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB215

Whenever a measure is proposed that repeals existing constitutional law, and deprives the voter of the right to weigh in, we need to step back and ask: who benefits from this? Is it the private citizen, who risks having a nuclear facility or waste site in their back yard? Or is it the global conglomerate who seeks cheap power for its data facilities? Haven't we ceded enough power to these folks already?
