Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

This number...the amount of wildlife killed on Oregon roads annually is STAGGERING. Obviously it's a risk to human life and property. But, more significantly, as we face a biodiversity crisis, shrinking wildlife populations, and species struggling to adapt to rapid (evolutionarily speaking) climate and habitat changes, creating wildlife corridors is a no-brainer. I would be embarrassed if this bill wasn't passed--it makes sense.
