

Submitter: J. Mannenbach

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure, Appointment or Topic: SB1003

48 hours is way too short of time to make an end of life decision. My mother is a perfect example. Misdiagnosed with dementia, it took about 2 to 3 weeks for the doctors to figure out they had the wrong combination of drugs. After they recognized the mistake, she regained the mind clarity and good health she was experiencing before the drug combination problem. Also, I believe most of our state representatives and senators do not respect human life to the degree level it deserves. Please respect life and vote no on this bill, SB1003.
