

Submitter: George B Hutchinson

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB215

Existing law has been established to protect the people and environment of Oregon. We have voted to prohibit nuclear power plants. This bill, coupled with the Trump administration's personnel cuts at NRC and gutting regulations concerning environmental and nuclear materials safety measures poses unnecessary risks to the health of Oregonians and all life in this state. SB 215 & 216 should be voted down to honor the will of and protect the health of Oregon's citizens.
