On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

I oppose this bill. The proposed revenue uses do nothing to address the core issue of tire wear waterway pollution. As such, this is simply an irresponsible sales tax on an already expensive safety item that a lot of Oregonians are currently struggling to afford without an additional tax expense. This bill CREATES a safety issue for Oregonians, and does zero to address pollution effecting several Federally listed salmon and steelhead species across the state. The bill authors and sponsors should be ashamed of themselves for wasting taxpayer dollars generating this garbage bill. Please do better for Oregonians.
